THE PROJECT

As Mulleres Salvaxes (Galiza 2018, 22') is a collective creation project carried out by a team of women linked to the audiovisual world and feminist militancy, who decide to work on a short film to shape their ideas. In order to achieve this, all the technical and creative resources were used for the interpretative work; communicating from the truth was one of the main objectives of the group. That's how *Corentena Produccións* was born, harboring artistic initiatives which help to bring out new stories. The stories of those who resist.

SYNOPSIS

Five friends, a costume party... Just one rule: animal costumes. The night is already revealed as a jungle. For Clara, the party will end soon after having to face a situation that she has been waiting for some time. The rest of her girlfriends will soon be facing the conflict like it's theirs. A debate that ceases to be just Clara's and becomes collective, creating a new story for all of them. A short film that speaks about the need for response, friendship and silences that end up through political positions.

CREW

Éire García Cid: Screenplay, director, director of photography, editor.
